Summary

Highly motivated Computer Science graduate with a strong foundation in software development, data structures, and system design. Passionate about building scalable, user-centred applications that solve real-world problems. Experienced in full-stack web development, AI, and data visualization through academic and personal projects. Quick learner, effective communicator, and team player seeking an internship or entry-level software development role to grow technical and professional expertise.

Education History

University of Cape Town:	Bachelor of Science in Computer Science and Business Computing (Graduated 2025)
University of the Western Cape:	Bachelor of Science in Computer Science (First Year - 2021) Dean's Merit Awards (Best First Year Student)
Relevant Coursework:	System Analysis, Design & Development, Data Structure & Algorithms, Database, Machine Learning, Parallel Computing, Mobile Design, Computer Networks, Project Management, ERP & Business Process Management.

Work Experience

February 2024 – Present: Tutor, UCT

- Tutor for CSC2001F (Database & Data structure), CSC2002S (Parallel Computing, Architecture, Mobile design & Development), INF2011S (System Design & Development).
- Helped students understand assignments and the concepts that were taught in class.
- Supported Lecturers in marking the tests and assignments for students.

July 2024: Vacancy Student, Byte Orbit

- Designed and developed an interactive web application for agile teams to estimate story points during sprint planning (Scrum Poker).
- Built a responsive UI using Vue.js, Vuetify, and CSS for a seamless user experience.
- Collaborated with a team to deliver the project and presented the final product to stakeholders at the end of the vacancy, explaining technical concepts and user functionality.

July 2022 – January 2023: Technical Support Agent, Payment24

- Provided friendly and efficient customer support by phone, email, or in person.
- Diagnose technical problems, and guide customers through troubleshooting (software or hardware) processes to identify and resolve issues.
- Assisted the team as a communication medium for new project deployment in French speaking countries.

Skills acquired: Time management, Collaboration, Teamwork, Communication, Problem-Solving, Adaptability, Paying attention to detail.

Projects

Research Visualization - ResViz (Capstone Project)

Python (FastAPI), Vue.js, D3.js, Cytoscape.js, SQLite

- Developed a web application to visualize research collaborations within a university.
- Enabled filtering by topics, departments, and collaboration strength using interactive network visualizations.
- Designed efficient data handling pipelines ensuring response times under one second for 5,000+ records.

Scrum Poker Web App - Vue.js, Vuetify, CSS

- Built an agile estimation tool that allows teams to vote on story points interactively during sprint planning.
- Focused on usability and responsive design for desktop and mobile.
- Presented to Byte Orbit management as part of a team-based project.

Peer-to-Peer Lending Platform – Lown (Hackathon Project)

Next.js, Tailwind CSS, Node.js, Open Payments API

- Conceptualized and developed a financial inclusion platform enabling micro-lending and transparent digital contracts.
- Integrated wallet connections and user dashboards for lenders and borrowers.
- Participated in the FinHub x Interledger Hackathon promoting open payment standards.

Technical Skills

Languages: Java, Python, C++, C#, JavaScript, HTML, CSS

Frameworks & Libraries: Vue.js, React, .NET, FastAPI, Node.js, Vuetify, Tailwind CSS, D3.js

Tools & Platforms: Figma, SAP S/4HANA, SQLite, Git, Microsoft Office

Concepts: OOP, System Design, Data Visualization, Machine Learning.

Interests and Hobbies

During my free time I enjoy playing video games and watching football.
